

FY2025 Management Report - Board Draft

Hanseatic Vessel Works Group GmbH | Hamburg headquarters and Gdansk production yard | Draft dated 9 January 2026

DRAFT - figures are unaudited. The report mixes accepted-vessel revenue with internal percentage-of-completion estimates. Do not use it as the statutory sales ledger.

Executive summary

- Reported group sales: EUR 13.1m, up 18% year on year.
- Three vessels accepted by customers; one hybrid crew-transfer vessel remains in progress.
- The Gdansk yard carried the largest production load. Older presentations still call it the Danzig yard.
- Intercompany engineering and yard recharges are included in location performance but should be eliminated at group level.

Reported vessel economics

Project / vessel	Revenue EURm	Cost EURm	Margin	Comment
Nordlicht (HH-407)	3.60	2.70	25.0%	Includes 0.20 upgrade; cost rounded before late class invoice
Baltic Surveyor	4.00	3.05	23.8%	Board pack excludes unsigned CO-17 cost and duplicate review
Amber Pilot / AP77	1.48	1.19	19.6%	Engine instalment may sit on Elbe Runner
Elbe Runner	1.60	1.80	(12.5%)	68% POC revenue; cost number is forecast-to-date blend
Hansa Tug	0.31	0.08	n/m	Deposit shown as order intake although LOI was cancelled

Board view of FY2025 revenue (EURm)

The chart totals EUR 13.10m due to rounding and classification. The detailed management recognition workbook totals EUR 13.058m. The chart also allocates only EUR 2.42m to services; EUR 0.16m of unallocated spares is folded into vessels by sales management.

Location performance

Location	External sales	Intercompany sales	Headcount	Notes
Hamburg HQ & yard	EUR 7.9m	EUR 0.60m	74	Includes design licence and group functions
Gdansk yard	EUR 4.7m	EUR 0.67m	128	Amber VAT gross was accidentally used in one local report
Group eliminations	-	EUR (1.05)m	-	Elimination journal incomplete by EUR 0.21m

Risks and open points

- Revenue recognition for Elbe Runner requires legal review: the signed contract appears to transfer title and unconditional payment rights only at acceptance.
- One Baltic Surveyor steel invoice may have been posted twice. Procurement says the second row is a scan-copy, not another delivery.
- December Gdansk labour was approved after year end and may not have reached the project ledger.
- The tax file contains a Polish VAT template at 22%; the controller believes the standard rate is 23%.
- Hansa Tug deposit remains in the bank despite a cancellation credit note. Treasury has not refunded it.

Board conclusion

Operationally, the group delivered three vessels. Financially, the definition of 'sales' must be stated before quoting a number: accepted external revenue, internal POC revenue, invoice volume, cash receipts, and location sales all produce different totals.
