

Yard Operations Notes and Email Prints

Mixed working notes exported from Hamburg and Gdansk shared folders. Statements are not approved accounting entries unless explicitly marked.

Email: duplicate Baltic steel invoice

From: Marta Lewandowska, Procurement. To: Finance Shared Service. 14 October 2025. Invoice number on the second steel posting for GD-11/B is the same scanned invoice, not a second delivery. Please reverse the manual-journal copy before close. I cannot see a reversal in the December export.

Email: Amber engine coding

From: Jan Kruger, Project Controls. Engine instalment described as AMBER-77 / serial HD-88421 was charged to ER-02. Amount in the cost export: approximately EUR 195,448. Move it to VSL-2504 before margin review.

Close note: Elbe Runner labour

The approved December Gdansk batch did not cross the interface. The time workbook contains the batch; the cost ledger does not. Batch amount is EUR 9,792. Do not add both the supervisor copy and payroll interface when it arrives.

PO note: Nordlicht class attendance

PO reference on the unassigned class/safety invoice belongs to NB-407 (Nordlicht). Expected amount about EUR 15,298. The project field was blank because NB-407 had already been closed in the ERP.

Workshop board - unresolved

- CO-17 cabins installed on Baltic Surveyor. Commercial says customer verbally agreed; Legal says no signed price change, so do not book revenue.
- Elbe Runner completion shown as 68% by cost, 61% by engineering milestones, and 72% by the yard foreman. No agreed measure.
- Amber Pilot invoice PL/2025/00901 used VAT code PL22. Local accountant says current standard template should be PL23.
- Hansa Tug reservation money still in the bank. Commercial calls it order intake; Legal calls it refundable.

Handwritten-style meeting transcript

12 Dec yard close - attendees: Ops, Finance, Sales

Sales: 'Revenue per ship should include upgrades; the ship brought us the follow-on work.' Finance: 'Contract revenue and later service revenue are different lines.' CEO: 'Show both, clearly labelled.'

Ops: Danzig-11 and GD-11/B are the same build. IT: alias table has not been approved. Finance: do not join on vessel name alone; Baltic Surveyor appears in customer service files after delivery.

Tax: zero VAT on vessel exports is not automatic. We need destination and customer evidence. One folder is incomplete.

Controller's margin note: Board cost for Baltic Surveyor omitted unsigned CO-17 and may also net the duplicated steel invoice twice. Recalculate from source evidence, not the slide.

This file contains useful links and unverified statements together. A model should surface them as candidates or clarification questions, not silently treat every sentence as authoritative.
